

FREE Virtual Seminar Series

Co-Organizers

Brad H Nelson, PhD,
Immunotherapy Program,
BC Cancer

Dan Hollern, PhD,
Nomis Center for Immunobiology and Microbial
Pathogenesis
Salk Institute

Tullia C Bruno, PhD,
Hillman Cancer Center,
University of Pittsburgh

Marie-Caroline Dieu-Nosjean, PhD,
Centre d'Immunologie et des Maladies Infectieuses
INSERM

Mission of BC³:

The goal of this new consortium is to bring together researchers from around the world interested in the B cell response to cancer, as well as related topics in fundamental B cell biology, autoimmunity, transplantation, infectious disease, and B cell engineering. The seminar series is meant to accelerate progress in the field and foster productive interactions between PIs & trainees for ideas and data sharing. Our goal is to attract a wide audience but at the same time focus on people who are passionate about these topics and collaborative by nature!

We are currently planning our second year of seminars. Please stay tuned for the Fall 2022/Spring 2023 line up.

Please contact Tullia Bruno (tbruno@pitt.edu) if you are interested in joining the series!
